Corpus callosum and frontal white matter from normal and 3-month chronic experimental allergic encephalomyelitis (EAE) were studied by light and electron microscopy and compared to controls. Changes consisted of a loss of oligodendrocytes, myelin sheath breakdown, macrophage infiltration, and axonal degeneration. Enzyme activity studies showed a reduction in Na+ K+ ATPase and cholinesterase in the myelin sheath. Furthermore, a decrease of 2',3'-cyclic nucleotide phosphodiesterase was detected in both corpus callosum and frontal white matter. These findings suggest that the loss of axons observed in chronic EAE could be mediated by an impaired function of macrophages during demyelination. The results also demonstrate that axons and myelin sheaths are still under the influence of other basic nerve functions.Q: Why does my function only show 1 output when it has 2 possible outcomes? I am creating a program that finds the average of the numbers entered by the user, but when it gets to the last section it only shows me 1 result when it should show the 2 possible results for both the average and the minimum and the maximum. Can anyone help me understand why this is happening and how I can fix it? Here is my code: private int getInput(Scanner scan) { int userInput = scan.nextInt(); return userInput; } public int getAverage(int num) { int min = Integer.MAX_VALUE; int max = Integer.MIN_VALUE; for (int i = a1d647c40b

The Baird government has announced plans to use up to 20 per cent of the proceeds from the sale of empty land in NSW for affordable housing, and they want to see it happen in urban areas. Treasurer Andrew Constance said the policy will be adopted in coming months, and under the policy, if a property is vacant for 12 months, the NSW Government will consider expropriating the land to create affordable housing. "Property owners would be compensated by a share of the sale price," Mr Constance said. The policy has sparked a flurry of debate over the past few days. "We are used to selling state land off in our public reserve land to private owners for whatever use," Mr Constance said. "But I think it is unique that the state is selling vacant land for an affordable housing program. "It is for the first time that you have a state government providing compensation for vacant land that could be used in a private housing development." New South Wales First Assistant Treasurer James Griffin said the initiative is part of the Baird government's "balanced housing solution". "It is in keeping with the government's commitment to ensure that affordable housing is provided in every area of the state and will deliver more than 20,000 new homes over the next decade," Mr Griffin said. In an interview with the ABC on Thursday, Mr Constance said the policy is not a "land grab". "The [state◆
