

[Download](#)

(Please note that this update will only update the Revit LT portion of your product suite. Open the same update folder and you will see that the Broken Files Index has been cleared. If you want to update separately, instead of opening this folder, just right-click on the file, select Update. Now go to the folder with your program. Move the contents to an empty folder and delete your file. Now you can update RevitLT. After the update, a window will appear with a message that the update is now possible and you can use it. Refresh this screen and see what happens. Click on the Next button to check that everything is working correctly. You can see that the updates were completed successfully. It remains only to edit the files. This is the easiest way to test the program and prepare it for further use. Launch Revit Revit and enter the name of your program, after which it will automatically start.
