Tech-Pro WinTouch is a simple-to-use and straightforward piece of kit that allows you to change the time of modification for files. It can be handled by all types of users, even by the ones with little or no experience in such tools. After a quick installation procedure, you are

---

welcomed by a standard frame with a minimalistic layout, representing Tech-Pro WinTouch' interface. The "what you see is what you get" principle clearly applies to the app, as there are no other options available, aside from the ones shown in the main frame. Files can be imported into the working environment by using only the "drag and drop"

---

method; you can add as many items as you want. Once the new date and time have been established, you can apply the new changes with the simple click of a button. In addition, you can make the app automatically use the current day's date. The app runs on a very low quantity of CPU and system memory, so it doesn't hog the computer's

---

resources. It has a good response time and immediately applies changes to the files, without making the operating system hang or crash. On the downside, we were unsuccessful in our attempt to change the timestamps of multiple files simultaneously (the tool popped up an error). But we must also take into account the fact that Tech-

Pro WinTouch has not been updated for a very long time. NEW ORLEANS -- New Orleans residents like Richard Feeney were harassed, threatened and then arrested for daring to own a parrot and caged parrot. On June 5, the federal government raided a parrot store in New Orleans that was owned by Feeney. The seizure

---

came as a shock to Feeney. "I just can't believe it," Feeney said. He said he has owned his store for the past five years. Feeney's parrot was not loose -- it was in a parrot cage. "Somebody that I had to find on the block was cussing me out and saying, 'I'm going to kill you,' and 'I'm going to blow your ass up,'" Feeney said. Feeney said

---

that was his first clue  
something was wrong.

"They were telling me that  
they were calling police  
on me and I had no idea  
what was going on,"  
Feeney said. According to  
local media, Fe

search, open and view multiple files. The "Popup" window helps you to select one or more files from a list. You can also specify the location of the file(s) so that the tool can find them, even if they are in different folders. Depending on the selected input option, the tool presents the users with a list of files (in Explorer) or gives them a

---

special window in which you can access the files (in other programs). This is often called "File List" or "Popup Window" option. Popup Window interface The "File List" or "Popup Window" window is an interesting concept, especially to those users who come from the Windows file manager world. In this window, the user can see

---

the original location of the selected file(s) and the selected items have a special icon/picture associated with them.

Popup Window File List view You can also display the selected files in the "File List" window by specifying the location of the file(s). In order to do this, you need to go to the "Options" dialog and specify the necessary

---

information, as the "Popup Window" window is used to view the selected files. File List interface Another important feature of this tool is the search option, which helps you locate files in the lists in which you want to browse. This includes a few filtering options and allows you to view the results in different ways. File List

---

Search option You can choose from three different view modes (anatomy, icon or both) in the "File List" window, including the "Common Properties". You can adjust the navigation options of the tool and find the file(s) you are looking for. File List options The tool's "Common Properties" window allows you to see

the output of many functions, such as:

- Adjusting the "Window Title" and "Toolbar" styles.
- Specifying the color scheme.
- Hide and show groups.
- Set Font, Text and Time and Date to foreground or background.
- Hide the toolbar (by pressing ESC) and replace it with a standard Windows toolbar (with a drop down menu).
