Description AutoCAD Architecture is a multiplatform native 2D AutoCAD-based application. AutoCAD Architecture is built in Visual Studio using Visual LISP and Autodesk Visual API libraries, which are included in the "AutoCAD Architecture" package. AutoCAD Architecture allows customization using Visual LISP, Visual Basic and Autodesk Visual API. AutoCAD Architecture is available for Windows, Linux, MacOS, iOS, Android, and web (HTML5). AutoCAD Architecture is aimed at small, medium, and large companies and organizations who need to design large-scale building design, electrical, civil, and structural projects. AutoCAD Architecture is also used by architects, engineers, and construction companies to analyze drawings, export and import them from and to various CAD applications, and create their own building information modeling (BIM) projects. AutoCAD Architecture provides a unique and powerful interface that allows users to easily locate any drawing, open it, analyze it, and

present it to others through a wide variety of views. Users can create their own drawing views, insert 3D and 2D models, as well as 2D and 3D drawings, and add notes to drawings. The capabilities of AutoCAD Architecture includes: 2D BIM - Based on Microsoft Windows, AutoCAD Architecture incorporates 2D Building Information Modeling (BIM). Dimensioning - Automatically draws dimension line and text labels based on distance and angle between objects Interactivity - Allows for easy interaction with objects in drawings through the drawing views. Interactivity is available for either the mouse or keyboard. Linking - Allows importing and exporting drawings to other programs including AutoCAD. Navigation - Allows for easy browsing of files, folders and folders Notes - Allows you to write notes to drawings, as well as import and export notes from and to a variety of applications. Markup Assist adds a new tool pane to the ribbon and to the Quick Access toolbar. Select a graphical tool in this pane to quickly import into your drawing a PDF, JPEG, BMP, TIFF, or other image file, and edit the image without leaving the drawing environment. Add markup to the imported image and transfer the changes to your drawing. (video: 2:02 min.) Insert and edit drawings directly from PowerPoint 2016: With the standard AutoCAD "Attach PowerPoint" command, you can upload a PowerPoint file or series of PowerPoint files directly into a drawing, but only if the file is a drawing in the same file format as AutoCAD (such as DXF). Now you can upload any PowerPoint file, regardless of format. (video: 3:27 min.) Add custom block style behavior to text that is cut and pasted in AutoCAD: With the Block Style Manager, you can assign a variety of behaviors to a custom block style. Cut and paste a piece of text, or part of a text string, and assign one or more of these behaviors to the custom block style. This allows you to have the custom block style perform different actions depending on which block or string of text it is associated with. (video: 1:37 min.) Add support for drawing pages in a PDF file: Create drawing pages automatically from PDFs. In PDF files, pages are displayed in a grid, with one unit of measure per page. Now, when you create a new drawing, you can choose to display the pages of a PDF in a grid, with one unit of measure per page. When you first import a PDF, the PDF is automatically separated into drawings and exported in grid format. Now, if you click to edit any of the existing drawings in the PDF, the new drawings are exported back to the PDF in grid format. (video: 2:47 min.) Add a new drawing behavior for scrolling to the last marker in a model space: Use the current model space to draw a line, circular arc, or other marker and then move to the previous model space to draw another line, circular arc, or other marker. Now when you move to the previous model space, you'll automatically be drawn to the last marker. (video: 3:41 min.) Select elements in the table of contents: Open the table of contents in a new window to
