The action RPG, Elden Ring: Rise, will land on PlayStation ®4, Xbox One[™], and Steam, worldwide in 2017. TECHNICAL INTRODUCTION Action RPGs are a type of online RPG with vibrant and dynamic battles and multiple characters in which you can have the illusion of having a large player base. Some action RPGs, such as "Dragon Quest," which was first released on the PS2 in 1994 and has sold over 30 million copies worldwide, have become pop culture. Elden Ring is an action RPG in which the setting and battle system of "Dragon Quest" are combined. Even though the game itself is not a "Dragon Quest" title, Elden Ring uses the rich characters, world, story, and gameplay of the series. In addition, it has a threedimensional battle system that is as dynamic and lively as a typical "Dragon Quest" battle. • "The Lands Between" Elden Ring is set in the world of "The Lands Between," which, unlike existing worlds, can be freely connected, and the world environment is vast. In this world, which is more than seven hundred billion square kilometers, people live with beliefs and values inherited from the past, and a variety of situations exist. The game itself is divided into "fragments" with a storyline that unfolds in real-time. In addition, the connection with other players for online play has been introduced to support a richer multiplayer experience. During online play, you can enjoy the presence of other players, creating the illusion of a large player base. • "Real-Time Battle System" In "Dragon Quest" games, the battles are conducted via turn-based systems, which are easy to understand and operate. In Elden Ring, the battles are conducted in real-time. In this game, your party is always active in the form of a circular firing formation that rotates around the front of the party. As the movement speed of your party is limited and you can only move within a certain distance, you will be unable to avoid an attack from enemies who surround you. You must have the courage to enter the fray yourself, decide when to attack, and take advantage of "Momentum" (hitting) and "Repel" (defending) to defeat enemies. · Asynchronous

The VOID TWO ELDEN RING - Coming Soon!

- ▼AN INTERACTIVE TALENT CAMPAIGN
- Global Collaboration with Creator The Void

The Void has invited esteemed game creators to join them in creating a brand-new game using our new game engine. The highly requested game engine of the powerful game creation platform, UNREAL ENGINE 4.21, can now be used to create games while providing an unprecedented level of development freedom and allowing users to create games to their hearts' content. What's more, the reality of the free and limitless content in the world of The Void is going to come to life with collaborative efforts by a wide variety of creators: developing, scriptwriting, and voice acting alone will already take up an enormous amount of time.

The creators who join in this national campaign will receive their compensation from The Void in the form of both monetary awards and exclusive in-game items. We will keep you up to date on the results and progress of their participation. While we have yet to announce a

Elden Ring (Updated 2022)

The Return of the Last Dragon God The Last Dragon God of the lands of Urist is back for

the first time in almost a decade. In the story-driven fantasy RPG, explore a vast world with your friends and defeat the dark lord that is awakening once again. Operation Dragon God Achieving and expanding the lands of Urist. As a system designer and producer responsible for the creation of the new fantasy action RPG, Tarnished: A Curse of the Elden Ring, I was inspired by the action RPG system of Dragon Quest and the Lord of the Rings (LOTR) series. Originally, the action RPG system Tarnished featured a main and sub-plot, but because of the necessity of offering choices to the users, I changed the main and sub-plot to make the plotline unfold in an interactive way. Since the release of Tarnished, I have gained a lot of feedback from fans. While being excited over these opinions, I wanted to gather a new development team to work together with me on Tarnished 3. While developing Tarnished 3, I was inspired by Team GODE's new RPG, The Legend of Heroes: Trails of Cold Steel, as well as the Kuro's Game and Final Fantasy XV related discussion, which reflected a change in the way that the players approach action RPGs. To adapt the new reality of gamers, I decided to develop Tarnished 3 with a new system. The gameplay system of Tarnished 3 is an action RPG of turn-based battles with a strong-connectivity feature. In the new system, the user chooses the characters that they want to use in battle. While attacking an enemy, you can decide to use the characters' status effects, or you can attack them with a normal attack. If you hit an enemy with the status effect, the status effect will have an effect on that enemy. If you successfully land an attack, your characters will receive experience points and have their combat abilities expanded. You can also repeat the same move with different postures and attack ranges. After you successfully turn your opponent into your ally, you can continue to enjoy the battle with party members. I want to create a multiplayer game in which everyone can enjoy their own party members. Also, a lot of the users have commented that they wished they could move on with their own party, and I think Tarnished 3 will offer a new method of enjoying
