**This is a tribute to Trogame, Troy Game Studio and the entire Savage World community. \*Note - Since the official PDF was not released until 6/29/2017, this will be heavily inspired by the rules in the PDF version of Time Zero: The Mirrors of Carthage, since those rules are still on the WotC website ( The download link from the link above (PDF) may change in the future. It should not, and if it does, then this file will be updated. Introduction The World of Time ZERO: The Mirrors of Carthage is a mirror world of our own fantasy genre, where the gods have pulled a couple of twisted pranks on our plane for the entertainment of their cosmic siblings. The fantasy genre of maps, adventures and characters has been tampered with to a point where the mirrors of the planes' gods have been shattered, casting their magic across the lands. Some of these heroic heroes have stumbled into the Time ZONE, a pocket dimension of our universe where time flows slower, while the attitude of the people in this zone is completely different, and seemingly reflects the people of our own world. The Mirrors of Carthage holds a number of fantastic options for introducing magic or normal fantasy elements, all in the unique imaginative world of that time period, where the shifting of various time zones across different plains has left only the recollection of ancient histories, in an almost inaccessible design that allows players to customize their own adventures. It is the epicenter of fighter vs magician battles, where the aligned warriors of people like the Numidians are constantly fighting against magicians, known as Time Wizards, whose job it is to see that everything runs on time, or, in fact, to play tricks on everyone by creating new constellations at the speed of**

**light (argh, sideburns, the speed of light!). In those battles, swords, arms and ships are employed as tools to fight ordinary beasts and magical creatures, many of which have evolved to the point of being awesome killing machines. The incredible range of the setting is a reflection of the author's commitment to the idea of creating a new world, which brings unparalleled possibilities to players and GMs. Ancient cultures and sentient machines have fought for supremacy and created an iron grip on the world**

**Push For Emor is inspired by the eponymous film from 1973. "Push For Emor" was directed by Louis Gossett Jr. and starred Timothy Hutton, Nana Visitor and Dennis Cole. It was filmed in the 70's in New York City where everything was redone with a late 20th Century feel (and set in the modern day). It featured a lot of in-your-face drama, like a gun fight in an elevator, and a lot of action sequences that looked - and sounded - more like a war movie than a science fiction flick. In other words, it was an R rated comic book come to life. While military themes are part of the story and play a role, I think that the core themes of the film were more about the fight against oppression, the sense of equality, personal liberty, freedom and rights against tyranny. I think the vibe I wanted to get across through the game is, while the Emorian's attempt to force everyone on Emorian planets to join their cause is evil, I get the feeling that their plans for Earth (Emorian Empire) are just misguided. All in all, I liked a lot of 80's movies (Mad Max, Predator) and wanted to make a game with a similar mood and tone. Source Code Push For Emor is a SciFi FPS RPG set in the world of Push For Emor. Emorian Empire The Emorian Empire is big and bad. They invaded the planet Emor a long time ago and took control, under their oppressive and bloody system. Now they are starting**
