“What really matters with any successful game is ensuring it is always on the edge, that every decision you make affects the game in one way or another,” said Steve Nash, Senior Producer at EA Sports. “We’re really proud of the new Dynamic AI in FIFA 22, which is unlike anything we’ve ever done before. It adapts to the moment, reacting to every decision and helping you dominate the match.” FIFA 22 also delivers heightened ball physics and improved goalkeeper movement, including dedicated “positioning” and “movement” behaviours, making defenders more intelligent and responsive in defense. Online Multiplayer FIFA 22 will feature the deepest, richest, most authentic online ecosystem to date - with the option to compete against friends and foes, create your own club and take part in a variety of official

tournaments. FIFA Ultimate Team will be a major focus of the online experience, including the ability to drop big gold transfer bonuses to your virtual squad and unlock new card packs for more players. FIFA Ultimate Team is also the only mode where you can play when the main game is offline, making it accessible wherever you are. This is made possible by a fully integrated FIFA Player app. Players will also have the opportunity to go head-to-head in online leagues and cups, including the Champions League. Players will also be able to improve their skill in competitive matches and compete on FIFA Points.

Interactive World Cup Experience The FIFA Ultimate Team World Cup Mode for FIFA 22 will be available for fans to play in real time as the World Cup tournament commences in June 2018. Players will have the chance to compete in official World Cup 2018 tournaments in various available FIFA tournament modes and improve their ability to develop and play their matchday squad. With more than three hundred different cards and players, the FIFA World Cup mode is a great way for players to get into the global competition for the FIFA World Cup 2018™, with more cards and players available in every FIFA World Cup™ edition than in the previous versions of the game. In addition to this, EA SPORTS FIFA is enhancing its popular online experience by introducing a number of new features and updates. For example, players are now able to make adjustments to team lineups before every fixture. Selecting your team has been made easier with a new in-match pick and pass command that takes the control to the player who would pick and pass more effectively,

Features Key:

- **A fresh look to FIFA** - FIFA 22 introduces "HyperMotion Technology," which uses motion capture data collected from 22 real-life players playing a complete, high-intensity football match in motion capture suits. The data collected from player movements, tackles, aerial duels and on-ball actions is used to power FIFA 22 gameplay.
- **Player Intelligence with improved EA SPORTS Football Club** - New Player Intelligence technology brings players to life in a new way, making

everyone visible and feeling more connected to their team. Adaptive AI - all 22 real-life player likenesses have been individually identified and used to make the most complete and varied AI team ever seen in a sports game. Dynamic Battles - AI players make decisions based on a team's roles and tactics, making for more realistic enemy A.I. New Goalkeeper Trainers - Real-world mechanics, animations and reactions allow you to master the craft of goalkeeping. New Freeze Frames - Intelligent face scanning gives each player a unique facial expression.

- **HyperDribbling** - Volleyballs, dodges, scuffs, sprints, and dekes are now more realistic thanks to the use of the player's own data from hundreds of matches on the pitch.
- **Premiership Soccer Championship** - Premier League or Bundesliga Champions and Eredivisie and Sp.S.S. Lazio Serie A Champions will be joining your club in FEBRUARY.
