IEC-TestServer Crack With Key PC/Windows

A server that simulates an IEC 60870-5-104. *This application is written in Java and can be used as a server on the local computer or on a webserver.* *This application was written for educational purposes only and is not supported by industrial partners.* *It also requires Java 1.6 and a JRE. The latest Java 1.6 version is 6.* *The latest version of this application is v0.5.1* *Last updated: August 15th 2013* Key Features:

----- IEC-
TestServer Features: -
Simulates an IEC
60870-5-104 server. -
Responsible for
connecting to a
client. - Responsible
for transmitting data.
- Supports
asynchronous and
synchronous transfers.
- Login system for
restricted access. -
List of clients. -
Subscribers - Guests -
User management (ADM)
- Templates - Manual
backup - Logging
(File, Log4J) - Log
viewer - Support for
multiple clients (e.g.
IEC 60870-5-101, IEC
60870-5-103, IEC
60870-5-404, IEC
60870-5-203) - Log
viewing - General

warnings (shutdown,
failure) - Command
line interface

Requirements:

----- To use
IEC-TestServer you
will need to have a
Java Runtime
Environment (JRE)
installed and a Java
Virtual Machine (VM)
installed on your
computer. To run IEC-
TestServer you will
need Windows IEC-
TestServer for Windows
2000 & XP, Windows IEC-
TestServer for Windows
Vista, Windows 2008
Server Linux/Unix IEC-
TestServer for Linux,
Unix IEC-TestServer
for Unix, Linux IEC-
TestServer for
FreeBSD, Mac OS IEC-
TestServer for Mac OS

X, Linux IEC-
TestServer for BSD,
macOS IEC-TestServer
for BSD OS X IEC-
TestServer Features:
IEC-TestServer
Features: *Supports
IEC 60870-5-101, IEC
60870-5-103, IEC
60870-5-203, IEC
60870-5-104, IEC
60870-5-410, IEC
60870-5-501, IEC
60870-5-504, IEC

=====
=====
===== IEC-
TestServer is a Java
based server that can
be used to simulate an
IEC 60870-5-104
network. This

application can be used by anyone that wants to simulate a IEC 60870-5-104 network in a lab. IEC-TestServer offers a simple interface to simulate a IEC 60870-5-104 network. The client side can be used to test events or to connect to the server. Additional information about how to get connected to IEC-TestServer can be found at the IEC-TestServer Downloads page. Features: =====
=====

==== IEC-TestServer provides a full featured web server that you can use to simulate an IEC

60870-5-104 network.
The application consists of the following sections:
0 Client connections
1 Event logs
2 Handler logs
3 Server options
4 Thread pool settings
5 SSL settings
6 Server SSL certificate settings
7 Server SSL certificate signer settings
8 Server SSL certificate request settings
9 Update server SSL settings
10 Setting printers
11 Settings page
Server

Features: =====
=====

IEC-TestServer is a fully featured web server. As mentioned above, the application consists of the

following sections. 0
Client connections 1
Event logs 2 Handler
logs 3 Server options
4 Thread pool settings
5 SSL settings 6
Server SSL certificate
settings 7 Server SSL
certificate signer
settings 8 Server SSL
certificate request
settings 9 Update
server SSL settings 10
Setting printers 11
Settings page Server
Configuration

Settings: =====
=====

The configuration
settings of the server
are located in the
Server Options
section. The
configuration settings
for IEC-TestServer can

be found at the following location:

- Server Options 1.
- Interface Settings 2.
- Server options 3.
- Server general settings 4.
- Server access settings

You can find the following server options:

1. Default IP address
2. Default port
3. Server address port
4. Automatic port reconfiguration
5. Enable or disable log events
6. Enable or disable thread pool
7. Enable or disable SSL communication
8. Enable or disable SSL certificate settings
9. SSL certificate root path
10. SSL certificate root password
11. SSL

certificate signer 12.

Default SSL

certificate name

What's New In?

IEC-TestServer provides a user interface for simulating the circuit and fault patterns

developed under the IEC 60870-5-104 suite. Test environments are obtained from a combined cost of IEC 60870-5-104 Part B and the corresponding IEC 60870-5-104 Part D. Standard circuit patterns and fault test patterns of the entire IEC 60870-5-104 suite are available in the system. For a more detailed IEC 60870-5-104 implementation, use the elements from the specification. The entire tool has been implemented using Java. J2EE technology provides the platform for the implementation of this tool. IEC-TestServer is a Java

tool, is free for commercial usage, is fully tested in the context of the IEC 60870-5-104 test environment and has been designed to be both cross-platform and cross-office compatible. IEC-TestServer -
