What do you do in a game that includes five characters? It's simple, but fun: You fight! As you play through the game, you can switch freely between characters as you determine which one you are most suited for. You can freely switch between the characters, and you're able to freely move on each character's turn. You can also customize the order in which you choose characters. For example, it's possible to choose the Warrior first, followed by the Wizard, and then the Monk. FIGHT! In battle, you have three main skills in two categories: Physical and Magical. Physical Skills and Physical Items Use Physical Skills in battle. Physical Skills attack the enemy and absorb damage. You can also use Physical Skills to clear your own status. Physical Skills are also used to activate Physical Items. Each character has a different set of Physical Items. Physical Items are activated by combining Physical Skills of the character in a certain way. When you combine Physical Skills of the same type, you can activate Physical Items by damaging your enemy. As you combine the skills and Physical Items, you'll be able to raise your Physical Stats. And if you increase them to certain levels, you can use the skills/items.

CATEGORY I: Physical Skills (Attack, Defense, Accuracy) (Classical Skills) FIGHT! You can use a physical skill that raises your Physical Stats, changing the way in which you use your skills. Physical Skill: FIGHT! Physical Items: Fighters' Gloves Use Physical Items to activate "Fighters' Gloves" and boost the attack power of a skill. As you activate it, you'll increase the number of hits in a single turn. Physical Items: Balance Booster Use this item to get rid of status that reduces your movement speed, such as "Sweeping Wind." Physical Items: Archery Skill's Bow This item can be used to increase the attack power of "Archery Skill" (classical skill).

CATEGORY II: Magical Skills (Defense, Combo, Buff) (Skill Items) FIGHT! You can use a magical skill that raises your Magical Stats, changing the way in which you use your skills. Magical Skill: FIGHT! Magical Items: Sweep of the Storm Use this item to clear your opponent's status with a strong blast

The GameQ: Adjust time series splitting time to sync to the whole time series I am currently making a predictive modeling model. I am dealing with time series data in which the time is different for each observation. However, the durations of each data can be considered to be very similar with the other. I would like to have a time series splitting in which the first value has a duration of 1 for the whole time series, and then following values have a duration of the first observation's duration. A simple example of my data would be: t y 0 7/3/2012 10 1 7/4/2012 10 2 7/7/2012 10 3 7/8/2012 10 4
