It offers support for HTML5 WebM, MP4 and OGG, as well as Flash (MP4). Hassle-free installation and user-friendly GUI The setup procedure takes minimal time and effort to finish. As far as the interface is concerned, ThunderSoft Video to HTML5 Converter adopts a normal window with a clear-cut structure, where video files can be added to the task list using the file browser only, since the drag-and-drop method is not supported. Batch processing is possible, which means that you can work with multiple items at once to reduce overall task time. Easily configure output settings So, you can check out the name, format, progress, size, duration and full path foe each file, change the default output directory and HTML file name, as well as apply HTML video tags, such as autoplay, controls and loop mode. In addition, you can select the output quality and preview the source videos in a built-in media player. Evaluation and conclusion The tool has minimal impact on computer performance, using low CPU and RAM. There were no 3a67dffeec
