Cuban told a group of Chicago Bulls players that he was behind the team's efforts to sign Deng. "I've been saying for a while they need to get a big and make an effort to sign Luol," Cuban told the Chicago Sun-Times. "This year we have a bunch of money going to the guards. It's time to go big." Cuban, according to the Sun-Times, was reportedly recruiting Bulls forward Taj Gibson to sign with the Mavs during free agency. His conversation with Deng's camp helped make the big man a priority for the Mavs. The Bulls eventually signed Deng and James Johnson to big deals, making the Mavs seem like the biggest winners of free agency in this year's class.Ever wondered what the best way to protect your liver is? We're here to help you, with a list of our current favourite liver shields! 1. Shelf-Dressing Between the years 1819 and 1829, Zollinger published a series of case studies in the journal Deutsches Centralblatt für Chirurgie (German Journal of Surgery) documenting the use of shelf-dressing for a variety of laparoscopic liver surgeries. In one patient, he described using four towels soaked in gallbladder- lysate to protect the liver, which he attributed to the "remarkable suppurative phenomenon that can be seen during the second stage of the operation." A few years later, in 1836, Zollinger described using four or five square towels to protect the liver in another patient who underwent a vertical lumbar flank incision. These surgeries became the historical standard of care for the management of liver disorders. [...] In the early 20th
