Observando las luces de las farolas que iluminan el vasto parking, vemos un diminuto cartel en el que se lee: "paso de aeropuerto en camino de hotel" y una iluminaci3n estelar que obedece a un sistema de sensorAs hidrAiulicas que rastrea el flujo de luz para ajustar el potente pAirtero de las farolas que pueden enmarcarse en el trayecto al hotel. En todos los lugares se pueden ver los inmuebles residenciales, algunos con grandes ventanales que estAn iluminados para asegurar la imagen de luz. Re: Pushing ISO to SD-Card : Do you know where i can find a video-driver for the newbie?? : I have an Acer TM500 (Clevo), Dell Laptop, SONY VAIO-PC, etc. : They all have the Sony type SD-Card, but when i try to open it : i get File Not Found. What can i do?? : Thanks First of all, if you're trying to open the file that SD card is storing, you should stop:1) Using Finder2) Using Windows Explorer.3) Using anything as it is this very card that is of no use to you at the moment and needs to be removed. Install and run WinRAR. Open WinRAR using its menu and choose "Add to

archive" and then "Extract files from archive" and then go to the SD card's Explorer folder. Extract the ISO. (after the installation there's usually a default (customizable) desktop environment (desktop image), so you'll have to use a console window, no GUI). You can usually find it by pressing alt+ctrl+f2. Once done, remove the SD card, reboot your laptop and select the new (new default) desktop environment from the GRUB menu. If you can't access it through GRUB, start your laptop and then press the F8 key immediately upon the login screen. If you don't see the option to enter the terminal, try F10.
