Polling firms are set to make changes to how they collect and analyse information under changes to electoral laws for federal and state elections made by the Liberal and National parties. The new laws — which have been approved by a Senate committee — will require all parties to retain digital voting documents for three years and will give the Australian Electoral Commission access to the poll information. However, pollsters said the changes may require changes to how they conduct their current work. A Senate committee has unanimously recommended that the changes be made under the law. Under the changes, the Liberal and National parties have requested that they retain no more than five years of digital voting information, rather than three, although the AEC has the ability to extend the data retention period. The Liberal party said the change was aimed at preventing security breaches. "The events in the last month have left us with no choice but to legislate for this," the party's policy director Simon Birmingham said. "This was one of the responses the Government needed to take action on. "The Government was motivated by the very real prospect that someone, somewhere might be able to access or derive information about electors from the documents that are held in the

Dark. Scary. Sometimes dangerous. Your success often depends on your hand-eye coordination and your ability to outmaneuver your opponents. Good luck, Jayde! Battle as a Gunslinger. Challenge your skills as a Crossbowman. The most prominent weapons in Jayde are crossbows, which work a little differently to anything else the player will experience. The crossbow comes with no ammunition to begin with, unlike the common firearms - it instead loads from ammo pouches on your body. You also have access to two items for crossbows: The Clamp, which fires and reloads the crossbow, and the Pitcher, which reloads the crossbow. Crossbows are effective, cheap weapons that fire bolts of ammunition. These weapons are popular due to their relative ease of use and ability to attack from afar. Crossbow bolts can be fired at point blank range and burst on impact. There are four varieties of bolts in the game: A quiver, which holds the ammunition that the crossbow can fire, is the key to making effective use of the crossbow. You can always carry 4 quivers at any time, with a total of 8 quivers, and you can choose between a quiver of bolts with 1, 2, 3, or 4 different types of ammunition. Each type of ammunition has their own ability. The crossbow is not the only way to make use of ammo pouches. You can also utilize items that can hold a variety of ammo. The Ammo Box, the Fitting, and the Cannister can all hold ammunition for multiple types of attacks. Ammo pouches and the crossbow are what make up the other main weapon classes in the game: The Gunslinger and the

Crossbowman. Gunslingers are effective combatants, able to wield any number of firearms in combat. Firearms include pistols, rifles, flintlock rifles, and repeaters. Gunplay is acrobatic, with the player able to scramble around the environment, hiding and dodging incoming attacks as they are made. Gunslingers are, however, at a moderate disadvantage in the melee combat - due to their reach, the player will rarely have the opportunity to close distance to their opponents. This is compensated for in combat by their ability to dodge, making them immune to the effects of stuns and other movement-based attacks. The Gunslinger also has an exclusive melee weapon, the Spring Knife, which can instantly be used to attack a target. Gunslingers make use of a plethora of special

What's new in Anodyne OST:

Peyton Manning saw his fingerprints all over the Super Bowl. He certainly deserves the MVP award for coming through when it counted the most.

Now, it's time to recognize some of the offensive stars that staked Manning to his fifth Super Bowl title. 1. Running back Knowshon Moreno Moreno was taken in the third round of the 2011 draft out of Georgia. He had 573 rushing yards and five touchdowns last season and made some play-makers around him better. Most notably, Moreno built drives that resulted in touchdowns, with the first with a 37-yard, 1-yard sweep in Indianapolis to start the second half and a 51-yard pass from Manning to Jacob Tamme to set up a 10-play, 30-yard march for the Colts' third touchdown on the final play of the first half. He also added two key catches early in the second half. Denver running backs have gained 4,729 yards and 33 touchdowns with Moreno at the controls. Very good. 2. Wide receiver Eric Decker The big undrafted free-agent acquisition from Delaware improved as the season went on and proved a worthy beneficiary of the Manning-Moreno chemistry early in the season,

catching a career-high 10 passes for 160 yards and a pair of touchdowns.

Decker rose to the occasion in a pivotal AFC Championship Game matchup with the Indianapolis Colts, making a 20-yard catch on third-and-7 in the fourth quarter and a 25-yard catch-and-run on third-and-2 in overtime to set up Drew Brees' winning touchdown pass to Marques Colston. In 16 games, Decker has 28 receptions for 616 yards and six scores. 3. Tight end Jacob Tamme Tamme made his mark early in the season with a big leap forward when he took over as the Broncos' starting tight end and he continued to produce as Manning's favorite pass catcher and red-zone target. Last season, he played a career-high 70 snaps, but Tamme is projected to get even more looks because of the injury to Julius Thomas. In a victory over the New York Jets in November, Tamme caught two passes for 60 yards and two touchdowns, including a 24-yard touchdown in the third quarter. 4. Wide receiver Bennie Fowler Fowler joined the Broncos and the club's training camp this summer and showed signs in the preseason that he could be a valuable contributor. After this past season ended, Fowler joined Norv Turner's
