
HyperChem808CRACKED!!TOP!! Fullrar

hyperchem808edrar Yesterday I received a parcel from China. I couldn't open it because the key didn't fit. Well, as a real man, I decided to do everything myself (that is, do not call the Chinese and do not wait in line at the post office).

He took wire cutters, tweezers and just bit off, or rather bit off and spat out the tongue that held the lock. Then I opened. Fortunately, there was not money, but spare parts for watches. And now to the point. I already wrote in my first article that I received the watch by mail and foolishly opened it and put the battery in.
