The Fire Thief is a high quality retro style 2D action adventure game set in ancient Greece inspired by the NES games Battle of Olympus and to a lesser degree Zelda II: The Aventure of Link. In this game you play as the Titan Prometheus, a demon of Mount Olympus (hence the name). After Prometheus steals the fire from the Gods of the mount Olympus (only access to their fire is forbidden to mortals) Zeus turns Prometheus into a mortal. The main reason for Prometheus to go on a quest is to get the power to turn back to a living being and return to Mount Olympus. In this adventure you collect artifacts and weapons to accomplish this goal. As you gain items your quest will take new twists, in other words this is a metroidvania style game. The game has a nonlinear gameplay which you as the player have to determine the best way to progress throughout the different areas. Features: Actions, dialogue and interactions Graphics and game mechanics Original soundtrack by Dan Butler Useful and informative text messages Simple controls and animations Save feature Controls configuration Choose difficulty (easy, normal and hard) About The Developer / Publisher Prometheus - The Fire Thief was made by John MacKinnon, the creator of several other games in the genre of Alien vs. Predator, outrigger, Genesis, etc... Game "Sparkle 2" Gameplay Love puzzle games? Well, then "Sparkle 2" is probably the closest you can get to one of those fantastical shows we all secretly watch. But you know what? That doesn't mean "Sparkle 2" is a stretch. In fact, it's a puzzle game that works for just about anyone. What's so great about the puzzles is that they are always simple, yet always interesting and tough to solve. The premise: In this version, you play as a detective that's been assigned to investigate all the various puzzle rooms in the kingdom. Each one is pretty interesting and focuses on a different subject matter, like history, biology, and even physics. The rooms are all themed to various holiday's or festivals, and they are presented visually in the same fashion as the TV show you might be familiar with. They all have that clever cartoon style in them. For the most part, the puzzles are more focused on logic and thinking, making the experience that much more of a relaxing puzzle experience. Even if you don't know anything about the theme, you'll still get a good, fun puzzle out of it. That is, unless you've become fed up with your horoscope and are trying to get away with a crime. As for the gameplay, it's fairly simple, but it requires a lot of thinking and playing. For one, every puzzle has some sort of puzzle board, where you can move around the different pieces. Every puzzle has a move limit for every piece, and you should plan out your moves when you get to each puzzle board. If you move a piece into the wrong spot, or beyond your puzzle board's move limit, you can't go back and move the piece again. Most puzzles also have a special piece that you will have to interact with in order to solve. Those puzzles can get very tricky if you're not careful, and you'll need to solve it with logic. I've been pretty damn excited to play "Sparkle 2" on this one, and it's been pretty incredible so far. If you're into puzzles, think you might find it interesting, or just want a relaxing game, then you can't go wrong with "Sparkle 2". Pros: Excellent puzzle gameplay Simple yet challenging puzzles Beautiful graphics and art style Logic puzzles that will have you thinking Cons: It can be incredibly difficult to puzzle with logic There are more puzzles than I originally

Vol. 2 Funklift Soundtrack Vol. 2 is a soundtrack album for a movie named Funklift. Composed by Tim Fackler and Jeffrey Lohn, it was released on 23 March 2004 by the Public Domain Records label. The scores The Scores Ao Dai () "Ao Dai" () – Choi Jong-hwan According to Choi Jong-hwan's own words, when he wrote "Ao Dai" (), "I had a dream about a beautiful room that has three walls and one glass wall, and there are birds flying around that room. As I was thinking about that kind of place, the instrument I played on this song was a kick drum. It was a very happy song for the morning. Bop Bop () "Bop Bop" () – Tae-woong Lee The specific title for this track was ": (경고:)", which means "Will the tree fall down? The ancient axioms of wood (warning: and probably folklore)". Characteristic of flamenco was added to the sound of the güiro, which created a sense of romance. Cha Da () "Cha Da" () – Lee-hsun Hong The music in this track is a fusion of traditional Korean folk songs and modern Western music. A geshou is also featured here. Koreans usually dislike the smell of the bird, but Lee made a happy song with a geshou... Cha Seut () "Cha Seut" () – Bak Seung-young The original story is about an old woman who continuously asked to buy rose bulbs. Bak Seung-young reflected the sadness of the old woman's loneliness in the sound of her voice. Di Jang (�

trical contact elements are used in a wide variety of devices, including electrical devices such as computers. These electrical contact elements may be, for example, male or female act structures for contacting male or female contacts of an electrical component, a male or female pin or receptacle for contacting a male or female pin or receptacle of an trical component, or wire-wrap electrical contact elements. Generally, when these electrical contact elements are in use, e.g., in attachment of a connector or board to a ponent, a force may be applied to one of the electrical contact elements thereby causing the contact element to bend or compress. This characteristic is particularly problematic n the electrical contact element is used to attach a relatively large connector (e.g., a connector having a dimension of three inches or larger) to a mating connector or board. cifically, if the force applied to the connector is relatively large, the connector
