What's new in Elden Ring:

A scary world awaits you in this epic fantasy story. Rise, Tarnished, and become an Elden Lord in the Lands Between!

In this upcoming browser game, named "OASIS II - Future of a Test Colony by COLOPLAY" is the story-based RPG where you control a rookie Elden Lord who is the protagonist. It is a way to connect with other players in a game atmosphere that can only be found in a browser game.

It's time to set off in search for the Southern Pearl of Eldia.

What awaits on the horizon?

From the 2.1 patch update of OASIS II - Future of a Test Colony by COLOPLAY, it is now possible to participate in a new adventure as the rookie adventurer; the protagonist is in a solo boat campaign. To steer your boat to new realms, there are new islands to be visited, new NPCs to meet and new quests to take on.

To get ahead, the apprentices could help pulling ropes and small crafts. However, they find that power needs to be applied for them to reach their destination quickly.

The same goes for the players who do not directly play through the story. Their jobs are no less important. They have to play the apprentice NPCs in exchange for the boat to be lowered to a lower level; as a result, if they succeed on being lucky, they can unlock a completion bonus.

In patients with cancer arising in the setting of chronic ulcerative colitis (UC), colectomy followed by permanent ileostomy has been the traditional approach. Recently, there has been a trend toward earlier resection of cancer, limited colectomy, and either permanent or temporary ileostomy. The purpose of this study was to compare the ileostomy closure rate and abdominal symptoms in patients after proctocolectomy for UC with and without cancer. Data were retrospectively collected on patients undergoing a colectomy with ileorectal anastomosis for UC at the Mayo Clinic between 1990 and 2006. Patients were divided into 2 groups based on pathologic findings: UC with malignancy (n = 105) and UC without malignancy (n = 226). A comparison was made between these 2 groups of patients. The median follow-up was 6 years. One patient had permanent ileostomy, and 196 (86.1 percent) had temporary ileostomy. There was no difference in the ileostomy closure rate between the cancer group (92.4 percent; 95 percent confidence interval [CI], 84.5 to 96.6) and the noncancer group (88.5 percent; 95 percent CI, 84.4 to 91.6). There was no significant difference in the abdominal symptoms between the groups. In patients with an ileostomy at the time of colectomy for UC, the ileostomy closure rate is similar with and without cancer. There is no difference in abdominal symptoms between the 2 groups of patients. the Soviet Union. As some of the other claimants to the 1945 Liberation of Austria were also recognized by the Austrian Senate, it has argued that it should not recognize the status of the Federal Republic of Germany. The Federal Republic of Germany has declared that the sovereignty and independence of the Federation of Austria within the Federal Republic of Germany is a legal and political reality that is to be respected and that Austria, in its entirety, is also part of German national state. The Senat has repeatedly dismissed Austrian claims that events
