Elegance 59.00 Hack 59.00 1 "Deemed as the sequel to Gold Saucer of Kame Island, Gold Saucer of Chocobo's Labyrinth, but more like they are two parts of the same game, in my opinion. The two games have completely different looks, but they have a lot of common elements like in-game money and easy to understand but rich expressions and dialogue. Despite that, those two games are too much different from each other, and that's because they were made by two different developers. In addition, the city of Caverna is mostly a cute city design, but the majority of the game world lacks the charm of the game. Somehow, I think the grand background of the game was well designed, and it seems more like an actual city, which is an amazing job." D.R. 59.00 2 "In my honest opinion, this is the best link of the NES/PlayStation/PSX era now. Since there are countless games like Brave Frontier, GyroZelda, or Rayman, I'm here to talk about how this game is different from those titles. First of all, I have to mention the story. I got this game for my mother and she liked it. It has a very interesting story, you don't just buy this game thinking about how to win. There are traps everywhere, but since the difficulty is not so high, it's easy to figure out all the traps. Gameplay-wise, this game is a mix of cards and RPGs. You have to buy a lot of weapons and items and you have to combine them to build your characters, but those are not the only gameplay. You can use specific moves and when you pass through different areas, you gain a higher level. The game is a little simple, but the more you play, the more it will be like a challenge. For the flaws, the game was released on the 3DS, so it's extremely hard to find but if you find it, you won't regret buying it. The voice acting is good and the battle system bff6bb2d33
