From FreeBB to WinRAR - Manage your files, videos, and pictures easily! All in the FREE desktop app.[Parasites and parasitology in ancient medicine]. The first medical sciences in the antiquity were the ritual of sacrifice, shamanism and magic. Nevertheless, the conceptual foundations for the practice of medicine could be already laid from many generations before. In the treatise O E Eudemos, compiled about 300 BC, Democedes of Croton creates a list of the causes of diseases and provides treatment for them. By the end of the IV century BC, Hippocrates begins the development of the conceptual foundations of medicine. The first texts of the treatise The Nature of Man, distributed as a series of letters, been written by Hippocrates, were probably between 430 BC and 400 BC. In the treatise, he provides the first conceptual foundations for the practice of medicine. In around 300 BC, he affirms that the human body is an organism and that is formed by four humors, black bile, phlegm, blood, and yellow bile, which form its basic structure and which each has its proper organ. Approximately fifty books are attributed to Hippocrates. Although he was a figure of historical, philosophical, social and scientific relevance in our culture, there are no ancient documents of his medical practice, contrary to what is said in the biographies of some authors, as Galen. The originality of Hippocrates is the idea of an intuitive scientific medicine, based on diagnosis, which was transmitted, during the Hellen 0cc13bf012

Class superclass; @end ]\] Numerous researchers are now looking for effective therapeutic  
agents to halt the process of AD. Although many efforts are underway to discover new  
therapies, it is still not clear whether the available symptomatic treatments are effective and  
safe. The targeting of neuroinflammation represents a promising approach for the  
development of new therapies in AD. Anti-inflammatory agents, usually referred to as immune  
modulators, are drugs that may target immune cells or molecules in the immune system to  
promote recovery from an infection or prevent or delay the progression of disease \[\[@B131
