The problem with that is that it is not a high quality product, so you aren't going to get high quality support. Unfortunately I don't remember the name of the site I got my copy of ESET from, but it was related to some IT company. From the troubleshooting guide: When the installation won't start, check the following: Make sure you have configured the correct license key and download key (or you will get the message "The installation key isn't valid") Make sure that you have set the correct Internet Connection Make sure that your firewall or proxy is disabled. Make sure that you have all of the updates installed for the product. You can always double check with ESET Technical Support. Just open a ticket with them and when you do, tell them that you're getting errors running the installer.

Now onto the good news... Update: 11/06/2015 ESET has released a new version of Kerio Control, and it is now compatible with Windows XP. You can download it right here. Kerio Control 7.4.2 The following are just a few reasons why I installed ESET Security for Kerio.
