I've tried specifying the `OverrideTransformAutomation="1"`, yet the process is not triggered (checked with Process Explorer) Any ideas? A: The trigger on a process is the WMI event start. You can use the query (I just downloaded the log you gave me: `SELECT * FROM __InstanceDeletionEvent WITHIN 2 WHERE TargetInstance ISA 'Win32_Process'` Find out more in the WMI documentation. Or you might have some luck using the `WAITFOR` statement for the event... The objectives of this work are to establish the role of intermediate filaments and the cell matrix in the regulation of normal and malignant epithelial cell behavior by the cytoskeleton; to establish the relationship of these properties to cell differentiation and possible malignant transformation. Microtubules, microfilaments and intermediate filaments will be analyzed in the same cell by selective extraction of various cytoskeletal components and their isolation and identification. The effect of the structure of the cell matrix on normal epithelial cell growth and differentiation will be studied in vitro and also in the development of embryonal and adult kidney tumors. Anti-oncogenicity and anti-metastatic activity of novel anti-malignant agents will be tested by their effect on cytoskeletal integrity of normal cells and the cultured transformation of normal cells induced by chemical carcinogens. Some of us in the blockchain industry are too young to remember the good old days of wild unregulated markets. Sure, we may have heard about the "Wild Wild West," but that was before Wild Wild West, that was before the Regulators appeared and started cleaning up the mess left behind. Regulated crypto markets are a great thing. We've seen some results on the charts lately (Waves X, monero, etc.). Regulated crypto markets can bring a new, young, exciting market to the forefront while also making the previously unregulated market more "grown up" in a way. Maybe this applies to the blockchain industry generally. Perhaps the fabled "wild west" is something we should emulate. Let's talk about what needs to happen in an unregulated blockchain industry. Without going into specifics, it's important to understand the history of the industry, with the help of some amazing people, such as: John McAfee has been very outspoken in the blockchain space. This is only one of his influential stances on technology. [tweet] The CryptoGrind podcast has c6a93da74d
