Hey guys, I'm in the middle of a bad situation. my computer froze and when it was fixed I was able to save all but all of my files. (I don't know why, but I just can't find them). My problem is that I can't delete files. nor delete. I couldn't even log into my desktop because my mouse didn't work. I did CCleaner and everything went well. I can login to my Windows account. But as soon as I try to download a file from my computer it says "this won't work because your disk is full. What should I do? How do I fix this Are you sure you didn't delete them instead of just moving them?"
