Bus Simulator 18 - MAN Bus Pack 1 Free Download [FULL]

i am an engineering student, and this bundle is exactly what i was looking for! i am specifically looking for sounds for a very unique product i am working on. for instance, we are using old buses. the sounds that come with the bundle exactly replicate the inside of a bus and the outside of a bus. thanks a million for giving these away for free! i am now one step closer to meeting my goal of having a specific sound for every bus in the world! - patrick the blue cat team are a bunch of numpty's. they see the sims as a money making exercise instead of investing time and energy into making the sims as realistic as possible. they churn out the same software each year, trying to make it work on a new platform or make it look different, and never really do anything to advance the realism or usability of sims in general. by offering those two, they reduce the sales of their commercial products and then offer a free bundle which tells people to go and buy their software instead. in my opinion, the bundle should be a high end free bundle, as it is made to sell their commercial products, not a low end one to flog a bunch of out of date software. if the bundle team give a serious response, they will find that sims fanatics around the world want their very own community, not some fake sims community like blue cat. very cool free bundle! :) i love how they emphasize the time-based processing effects. i've always been a fan of the ones that combine chorus, phaser, flanger and vibrato in one and i always wanted to try and get one. this free bundle is very useful to get some ideas. i was actually about to buy the vanilla version of bus simulator, but now i decided to wait for the free version as well, so thanks! - danial 5ec8ef588b
