FE-170/X-760/ Since I'm on Windows 7 now, I can't upload images. Since you are trying to use the Olympus Master software, open the program and try. If you are unable to upload images, try the following. 1. Make sure you have enough free hard disk space. 2. Try downloading the images to a different location on your hard drive. 3. Try uploading files to a different directory on your local hard drive. 4. Try uploading the files to a different directory on your network. 5. Try uploading files to another application. 6. Try loading the files into another application other than Photoshop. 7.
