The free trial period downloaded a number of additional Adobe applications to my computer. I will discuss this in a future article on themisphotoshop.com. After I opened the application, I was presented with a simple window. You'd think that this would be a simple product, but many of these minor matters touch on design flaws, usability issues, and a need for better apps. It was definitely fun to play with, but often a bit rough around the edges. In the end, I enjoyed my two-week experience with the Creative Cloud and its apps more than I expected to. There was the interminable loading screen. There were the annoying Universal Image Loader notification banners. There were some initial bugs. But for the most part, I thoroughly enjoyed my time with the app and plan on using it much more. It's my go-to app for doing #allmyphotos on a daily basis. I'll also be buying another copy in the near future to keep a copy at home and one in the office for local use. If you're considering migrating to the Photostream and to Creative Cloud, I think this will be the point when you'll begin the process. But I only recommend it if you've already dabbled with Lightroom in some way. Color curves are great fun and there's really no other app that lets you play with them quite like lightroom.
