Category:Nursing qualificationsQ: How to configure assets path in mini\_magento using composer? I am using mini\_magento. In my web.xml I tried to pass like this as per the documentation:  
mini\_magento\_assets\_base\_url /images/small The assets/small folder is already present in the root. I am unable to find the path of mini\_magento's assets folder. A: The idea of mini\_magento is, that you can point to your asset's paths at "any" location. mini\_magento folder and (in most cases) asset paths are not the same. An example: The mini\_magento path is  
app/code/community/Aura/Demo/view/frontend/web/css/styles.css The path in asset/css (in this case) will be app/design/frontend/my\_theme/my\_theme\_onepager/web/css/styles.css You can set the location as you like. I don't use mini\_magento at all, so I have no idea, how it's configured there. To set an assets path at app/etc/config.xml, use something like this: my\_theme\_onepager/js  
my\_theme\_onepager/css
