My first experience with the iPad version of Photoshop was at the Macworld Expo. Ray Wenderlich, who is best known as maker of the Swift and SpriteKit game development kits, demoed the iPad version of Photoshop. I then had a chance to compare it to the desktop version, which uses a touch pad for most functions. I liked what I saw. However, in the end, she notes that its missing some key things. "In my opinion, the Z.Z. is a good program with a lot to offer any professional or amateur photographer. It has some features that are not found in the Cobasmate LITE edition. If you are looking for a program that is full featured and has all of the functions you would find in Adobe's version, you need to consider this. [But] it does not have all of the features that Cobasmate LITE Edition does." Photoshop's got a limited selection of tools, and lacks an API (Application Programming Interface). The tools are straightforward, but they lack power, and a lot of shortcuts would let you cut a lot of time off that labor. But it's hard to complain. Photoshop is very powerful, and very feature-rich. It can do what most people need to do, and does it well. Few hardware upgrades are going to improve your life without new software. In that regard, Photoshop CS6 is a worthy successor to CS5. There have been showstoppers like the lack of Flash export and the Unified Materials System (UMS)—both of which are addressed to varying degrees in the software—but Photoshop itself exhibits no flaws. It's still a workhorse in a field where no other software is as broadly adopted.

• On top of the above, the Federal Trade Commission's 2015 update to the rules for the Magnuson-Moss Warranty Act – which governs the car warranty check – said that manufacturers are no longer allowed to make claims on parts that have been discontinued. The result of those three factors is that you can no longer argue that a higher-priced car or more advanced equipment is more reliable because it is made with a newer, more reliable design or with parts that have been proven over the last six years. For example, if I give you a car that has a sunroof sold as a separate component, and you drive it into a ravine and I replace it with a newer version, I am not covered by the new part. My replacement doesn't meet the original specification, so my warranty is void.
